## MEMORANDUM FOR RECORD

SUBJECT: Photographic Film Processing Coordination

1. Reference meeting at Project Operations, 19 February 1960, with the following personnel present:

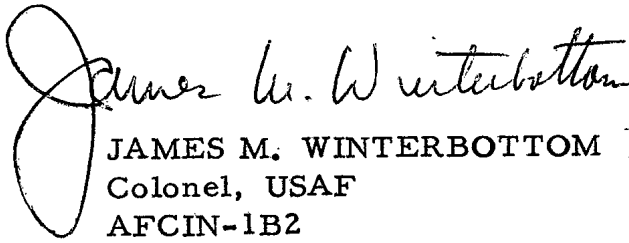

Colonel Burke -	Chief, Project Operations
Colonel Andrews -	AFOOP-RG
Colonel Winterbottom -	AFCIN-1B2
Major Coursey -	AFCIN-1B2

2. The problems discussed at this meeting included the responsibility and prime interest for the handling and processing of photography obtained from CHALICE/TALENT operations.

3. The Project Director has assigned the responsibility for film processing to the Project Operations. Under this responsibility, Project Operations supervises the activities of the Contractor Facility to insure the efficient handling, processing, and preparation of high quality materials. To insure that this capability is maintained, the Project Operations has highly trained technical personnel assigned.

4. Due to the urgency of some intelligence requirements, the delay of couriering raw original film to the Contractor Agency cannot be assumed. In this case, the Air Force assumes the responsibility for Project Operations, and processes the raw film in the URPIC's assigned to USAFE and PACAF.

5. Therefore, in dealing with problems associated with the processing of film at the Air Force URPIC's, it was agreed by personnel attending this meeting, that solutions, fixes, notifications, complaints, and any items pertaining to the operation of URPIC's would be in the vested interest of Project Operations, and as such, would be the responsible agency for so notifying and working out acceptable results with the Air Force.

  
JAMES M. WINTERBOTTOM
